

## **FEWD 72 Final Project - Dinner Picker - Scope**

### **Objective**

To offer consumers a novel approach to answering the age old question: “What’s for dinner?” This simple question, asked in millions of homes worldwide on a daily basis, can sometimes be hard to answer - especially for people who are new to cooking, new to healthy eating, or have recently changed their eating habits.

### **Details**

We’ve all heard the question a thousand times: “What’s for dinner?” With Dinner Picker, coming up with new and healthy meals is easy - just roll the dice. Roll 1 die for protein, 1 for a veggie, 1 for a “body” veggie or starch, and 1 for a flavor palette - and dinner’s almost on the table.

Version 1 is aimed at the paleo eater, and includes gluten-free, paleo, and Whole30 safe ingredients.
